National Certification and Registration Program for Certified Pool-Spa Operator

NSPF EXAMINATION:

A score of 75% or better and attendance both days of class qualifies you as a Certified Pool/Spa Operator.

CPO CERTIFICATES:

After successful completion of the course, graduates will receive a certificate suitable for framing and a CPO wallet card. Both items include your personal CPO registration number, which is permanently recorded by the National Swimming Pool Foundation. It states that the diploma was earned through the NSPF.

THE TEXTBOOK:

The textbook for the course is the Pool/Spa Operators handbook, an invaluable resource and reference for the novice and the professional who must trouble shoot on a broad spectrum of functional problems. In short, every pool operator should have one.

Subject matter includes chemistry, filtration, recirculation, all types of pool equipment, preventative maintenance, seasonal care, storage and handling of chemicals, safety, energy use and conservation and much more. All topics are written by experts with long experience in their specialties and the course has been thoroughly "field tested."

COURSE CONDUCTED BY:

Evan Bloyer, CPO Instructor, President/Owner of Midwest Pool Supply & Consultant in pool operation and management.

WHY YOU NEED THE TRAINING:

The CPO seal of approval is assurance to pool and spa owners, from motels to Olympic size municipal and college pools that their facilities and their swimmers are under the supervision of trained professionals. The CPO is trained in the most advanced techniques in safety, water chemistry, maintenance and management.

The rapid advance in know-how and technology of pool operation requires constant updating of skills. With over 7.5 million pools in use the need for qualified operators is greater than ever. And the need will continue to grow. Certified Pool Operators must keep the facility in good operational order and maintain the equipment. Only an individual with suitable training and experience is qualified to meet such responsibilities.

As designed by the foundation's consulting specialists, this certification program provides standardized instructional literature and visual aids of immediate value to all pool operators.

With the adoption of the proposed Wisconsin Department of Health Regulations, the NSPF CPO will be the required level of training.

**All participants must bring
a calculator!**
